

Right Angle Fluid Temperature Sensor

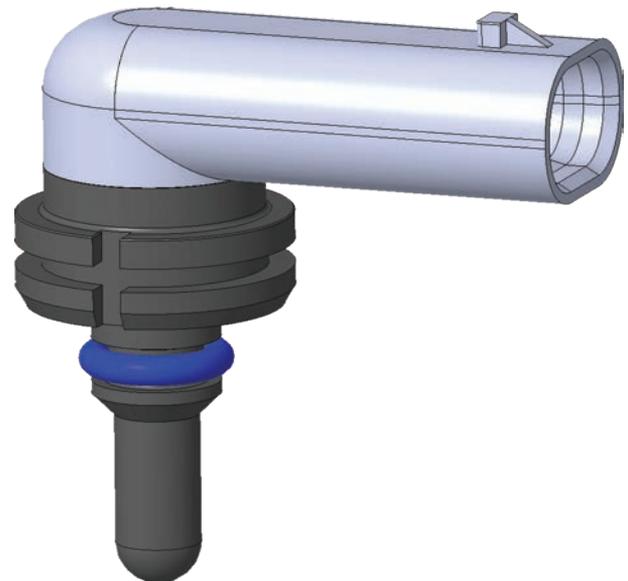

Thermometrics Right Angle Fluid Temperature Sensors measure and monitor the temperature of a variety of fluids. The right angle design of this sensor makes it ideal for compact spaces, and the incorporation of the spring clip provides a quick means for both installation and removal.

Features

- Operating Temperature: -40°C ~ 125°C
- USCAR 1.2mm sealed connection system
- High accuracy and long-term stability
- Right angle design for compact space applications
- Field-proven spring clip design
- Alternate RVT curves available upon request
- RoHS Compliant

Applications

- Battery Coolant Temperature
- Engine Coolant Temperature
- Outside Air Temperature
- Industrial Temperature Monitor

Ordering Information:

Part Number	Resistance @25°C
CTTS-302839-F02	10K Ω ±1.5%
